Meet Chava Shelhav and Ortal Goldshmid

Child' Space – Early Childhood Development

Friday, October 21, 2022

Internationally renowned child development experts Dr. Chava Shelhav and Ortal Goldshmid are conducting a Child' Space introductory workshop for the professional Child' Space training program, starting in April 2023 in Vienna, Austria.

Child' Space is a unique method of sensory movement education that encourages babies' development, using mindful touch, playful movement and communication. This promotes learning skills, motor development and social-emotional growth, building a significant foundation for life.

The Child' Space certificate program trains you to work with babies and families, in private lessons and group sessions. You will gain competence to work with babies with a typical development as well as children with developmental delays and special needs.

This workshop will give you the opportunity to experience a Child' Space developmental movement lesson. Furthermore, you will gain insights how this unique approach is applied in a session with baby and caregiver.

If you join our Child' Space Vienna training program 2023, this workshop will be free of charge.

Friday, October 21, 2022, from 15:00 to 18:00.

**Workshop fee: € 60,- (incl. USt./VAT),
€ 48,- reduced (e.g. students)**

The workshop will be taught in English.
